

PIP Item 2B.2.2 - Provide training to staff on how to use reports

On August 18, 2010, Dr. Ruth Huebner, Child Welfare Researcher, and the Information and Quality Improvement staff (IQI) held a statewide teleconference with all of the Regional CQI Specialist and PIP Leads. All of the Protection and Permanency central office management team were in attendance as well. Dr. Ruth discussed placement stability and the three resources that are available to the regions to assist them with developing their action plans and measuring their progress. Those resources are the: Diligent recruitment plan, the Dispersion maps and reports from the SACWIS system.

Dr. Ruth went into great detail about how to use and analyze the information contained in the Federal DIG, the TWIST 178 and 058 summary reports.

The 058S is a statewide report summary on all children who are in placement (examples of reports used in training are included in this submission). The 178 is a statewide report summary on all children who have had no more than two placements.

Since the on-site review, the agency has made significant progress with tracking placement moves on children in the custody of the state. Up until that time, the agency was unable to effectively track children that were placed in Private Child Care. On January 1, 2009, the PCC Tracking Module went into effect which allowed all placements to be entered into the SACWIS system.
